Contents

Ad-hoc Modules

- Eurostat Ad-hoc Modules
- Accident at Work and Work-related Health Problems
- Work Organisation and Working Time Arrangements

Ad-hoc Modules

- In the LFS The core topics are collected every year and comprise labour status, income, economic activity, demography, education, and technical variables. In addition to the annual variables, survey includes also variables collected via modules.
- From 1999 to 2020, the EU-LFS was supplemented every year with so called EU-LFS ad-hoc modules. There was a different ad-hoc module every year.

Ad-hoc Modules

- Since 2021, there is a combination of 8-yearly regular modules. The purpose of the modules is to provide users with statistics on a specific topic concerning the labour market by adding each year a set of variables to supplement the core EU-LFS.
- The number of structural variables to be collected on an ad hoc subject every 4 years shall not exceed 11 in a given year.

Ad-hoc Modules in Türkiye

2007 - Work related accidents, health problems and hazardous exposure

2009 - Entry of young people into the labour market

2011 - Employment of disabled people

2013 - Accidents at work and other work-related health problems

2016 - Young people on the labour market

2017 - Self-employment

2018 - Reconciliation between work and family life

2019 - Work organisation and working time arrangements

2024 - Young people on the labour market

Accidents at Work and Work-Related Health Problems

- "The Research on Accidents at Work and Work-related Health Problems" which was applied for the first time in 2007, was conducted together with Household Labour Force Survey in the period of April, May and June 2013 as the second time in Turkey.
- The results of the survey give information whether persons who employed during the survey reference week or had been employed within last 12 months encountered any accident at work or suffered from work-related health problems within the last 12 months.

Accidents at Work and Work-Related Health Problems

The rate of persons encountered accidents at work by economic activity, 2007- 2013

Accidents at Work and Work-Related Health Problems

The rate of persons suffered from work-related health problems, 2007- 2013

Work Organization and Working Time Arrangements

- Ad-hoc module survey was applied together with Household Labour Force Survey in the second quarter of 2019 (April, May and June).
- The aim of this is to measure aspects of work organisation and working time arrangements identifying their flexibility for workers and employers.

Work Organization and Working Time Arrangements

Flexibility of employed persons to start and end of working time, Quarter II- 2019

Employment status	Total	Determining the start and end of the working time: Fully decide their working time themself	Decide their working time with certain restrictions	Employer, organisation, clients, tasks or legal regulations decide
	(bin)			
Total	**28 269**	**8 438**	**2 546**	**17 285**
Regular or casual employee	**19 293**	1 199	1 540	16 553
Employer	**1 253**	972	135	146
Self employed	**4 781**	3 966	416	399
Unpaid family worker	**2 942**	2 300	456	186
	(%)			
Total	**100.0**	**29.8**	**9.0**	**61.1**
Regular or casual employee	**100.0**	6.2	8.0	85.8
Employer	**100.0**	77.6	10.8	11.7
Self employed	**100.0**	83.0	8.7	8.3
Unpaid family worker	**100.0**	78.2	15.5	6.3

Figures in table may not add up to totals due to rounding.

Work Organization and Working Time Arrangements

The ratio of working under time pressure, Quarter II - 2019

Work Organization and Working Time Arrangements

The recording of presence or working hours of regular or casual employee, Quarter II - 2019

Child Labour Force Survey

Because of the need for current data about child labour, survey was implemented five times: *1994, 1999, 2006, 2012 and 2019.* Survey was applied in the 4th quarter of these years with LFS.

Under international instruments relating to "worst forms of child labour" and "child rights" any person under age 18 is a child. Hence, persons in the 5-17 age group are covered in these surveys and defined as "children."

The 5th the Working Child Survey was be implemented in fourth quarter of 2019.
