EDUCATION EXPENDITURE STATISTICS (1)

- Expenditures made directly or indirectly related to educational activities within the scope of formal education are considered as “Education Expenditure”.
- Studies on this subject include formal education and supporting activities within the borders of Türkiye. Non-formal education activities are out of scope.
- Education Expenditures Statistics are published regularly every year, including information from 2011 and beyond.
- With this study, the total education expenditure in our country according to education levels, education expenditure per student, the contribution of central and local government institutions, households, private legal entities and international funds to education are calculated. In addition, transfers from the state to households, transfers made by private legal entities to households, current expenditures and capital expenditures made by service providers are also compiled in the education level detail.
