Official Statistics Programme

The Official Statistics Program (OSP) provides five-year terms based on the Turkish Statistical Law No. 5429 in order to determine the basic principles and standards regarding the production and publication of official statistics, and to ensure the production of up-to-date, reliable, timely, transparent and impartial data in the fields needed at the national and international level.

With the entry into force of the Program in 2007, the data envisaged to be produced by other institutions and organizations in the OSP, and data published by TurkStat, were accepted as official statistics. Thus, it was ensured that a single reliable official statistics were produced in every required field.

Official Statistics Programme

Theme 3. Social Statistics

3.5. Crime, Justice and Election Statistics

3.5.1 Justice statistics

3.5.2 Prison statistics

3.5.3 Statistics on juveniles brought into security unit

3.5.4 Law enforcement statistics

3.5.5 Election statistics

1 Law Enforcement Statistics

Law Enforcement statistics include the information on crime incidents that occurred in the areas of responsibility of the General Directorate of Security (GDS), the General Commandership of Gendarmerie (GCG), the Coast Guard Commandership, crimes, suspects and victims in these incidents. The three organization are organized under the Ministry of Interior.

Law enforcement statistics have been transferred to the Ministry of Interior within the context of OSP. The activities of the related organization regarding the production of statistics are being monitored by TurkStat. Regular statistics have not been produced since 2009 due to the fact that data updating and restructuring of the administrative records of the General Directorate of Security had been continued, and statistics can be produced partially for international information requests.

The Ministry of Interior has been carrying out a project called İVME in order to create a database which includes all kind of crime data. TurkStat plans to produce crime statistics based on İVME data in relation with the Ministry.

2 Statistics on Juveniles Received into Security Unit

The main purpose of the statistics on juveniles brought into security units is to present information that will form the basis for preventive, protective and remedial measures in line with the information obtained from juvenile delinquency and victimization in our country.

Statistics consists of information about the children who come or are brought to the security unit affiliated to the police (GDS) and gendarmerie (GCG).

GDS and GCG send administrative micro data annually to Turkstat. To increase the quality of data, micro data are received in midyear for the first half of the year. TurkStat analysis data and sends the problems via official paper to the organizations. At the same time, communication between TurkStat and organizations continues via telephone and e mail.

Annual data is received in February-April of the year then the same procedure is repeated. As a result, statistics is published annually as press release by Turkstat as well as tables on web page.

Statistics are planned to be published by the Ministry of Interior as press release following the completion of the necessary studies related to IVME.

3 Justice Statistics

- The Ministry of Justice is responsible organization according to OSP
- The Ministry prepares publication as draft and sends it to TurkStat to review
- Statistics are published annually as publication and press release also on web page of the Ministry
- The content: Justice Statistics are composed of the statistics on **justice organization, prosecution** and **court** stages in the crime and criminal justice system.
- **Justice organization** includes the Constitutional Court, the Council of State, the Supreme Court, the Court of Jurisdictional Disputes, the High Board of Arbitration, the Enforcement Directories, the Turkish Notary Public Union, the Union of Turkish Bar Associations and the Council of Forensic Medicine.
- Statistics on **prosecution** and **court** stages are files/cases for new files/cases in the year, from the last year, judged and postponed until next year as well as crime, suspect/accused person, defendant, plaintiff, victim and personnel.
- TurkStat experts worked together with the personnel of the Ministry in order to improve statistics.

3 Justice Statistics

- In the field of justice statistics, the Ministry of Justice also has an annual publication named Judicial Statistics.
- TurkStat and the Ministry have been working on combining these two publications.
- The Ministry of Justice has implemented a Project titled 'Increasing the Quality and Capacity of Justice Statistics'. The Project has improved the quality and diversity of the statistics.

Data source

UYAP- National Judiciary Network Information System

It is an information system that provides the internal automation of the central and provincial organizations of the Ministry of Justice, its subsidiaries and related organizations, public institutions, organizations. All kind of data on justice organization, prosecution and court including crimes, suspects and victims are involved in the system.

It is possible to produce instantaneous statistics.

Not. 20 Temmuz 2016 tarihinden itibaren İdari Yargıda; Bölge İdare Mahkemelerinin istinaf mahkemeleri olarak yargılama yapmaları nedeniyle, ilk derece mahkemelerine ait iş bu tabloda gösterilmeyerek tablo revize edilmiştir.

Note. As of 20 July 2016, in Administrative Jurisdiction; since the Regional Administrative Courts have acted as courts of appeal, the duty of the courts of first instance is not shown in this table, and the table has been revised.

4 Prison Statistics

The information about convicts who enter and leave prison by being given a freedom-binding sentence (imprisonment) by the court due to the crime or crimes they have committed, is covered. Additionally, data on prison facilities and personnel are also covered.

The data source has been the National Judicial Network Information System (UYAP) since 2009.

The convict micro data annually is received from Ministry of Justice on UYAP and to produce statistics the data is analyzed by using SAS Statistics programme by TurkStat. However, the statistics will continue to be published by the Ministry of Justice as of 2022 according to OSP.

TurkStat uses the other data bases such as population and education related to these statistics.

The statistics are published as press release as well as on TurkStat web page.

5 Election Statistics

Election statistics is produced by TurkStat according to the special law on elections.

The elections in Turkey are under responsibility of Supreme Election Council (SEC).

TurkStat plans a special study together IT Department within TurkStat.

Before election, TurkStat prepares registration pattern of data special to the election and sends to SEC.

SEC sends data according to this registration pattern to TurkStat after election.

TurkStat follows official gazette for changes in election procedure in local level in cooperation with SEC. For the final data, all kind of changes should be completed within context of the law.

TurkStat uses the other data bases such as population and education in TurkStat in producing statistics.

5 Election Statistics

6 Crime Victimization Survey

Turkey, officially, did not have any victimization survey at national level.

TurkStat implemented a Project in order to have methodological framework to implement the first national level crime victimization survey (CVS) on a topic which is of central importance to EU policy concerns as well as other national and international organizations.

TurkStat worked with a foreign consultant to provide necessary training, advice and guidance for setting up a pilot CVS and develop a questionnaire for use in CVS in Turkey.

A draft questionnaire was designed together with consultant.

Pretests and pilot survey were not conducted of the Covid-19 pandemic.

TurkStat has been working on activities to conduct CVS.

Thank you for your attention...
