1. Used for making international comparisons of the extent to which governments are involved in particular economic and social function
2. For the analysis purposes, COFOG provides key aggregates that could be used as indicator or measures the result. Eg: study on the impact of economic growth on the environment may require information on the expenditure on environment protection.

3. Government services can benefit the community either individual or collectively. COFOG is used to distinguish between individual and collective services provided by general government (SNA 2008)

Predominantly **collective consumption** (a collective consumption service is a service provided simultaneously to all members of the community or to all members of a particular section of the community, such as all households living in a particular region)

- 01 General public services
- 02 Defense
- 03 Public order and safety
- 04 Economic affairs
- 05 Environment protection
- 06 Housing and community amenities

Predominantly **individual consumption** (an individual consumption good or service is one that is acquired by a household and used to satisfy the needs or wants of members of that households)
