- SDG5 Indicators of Türkiye
  - Available SDG5 indicators
  - Proxy indicators
  - Unavailable SDG5 indicators
    - Road Map
Goal 5: Achieve gender equality and empower all women and girls

- 9 Targets
- 14 indicators

  - 9 indicators are produced in Turkey
    - 7 available indicators as global
    - 2 proxy indicators
      - From 4 public institutions:
        - Ministry of Family and Social Services
        - TurkStat
        - Hacettepe University Institute of Population Studies
        - Ministry of Agriculture and Forestry
      - 4 non-statistical indicators
      - 1 irrelevant indicator

Available SDG 5 Indicators by Producers and Sources

Data sources of SDG5 indicators produced by TurkStat

- Marriage Statistics
- Time Use Survey
- Election of Representatives Statistics, Election of Local Administration Statistics - Social Statistics Department
- Household Labour Force Survey – Labor and Life Conditions Department
- Survey on Information and Communication Technology (ICT) Usage in Households and by Individuals - Sectoral Statistics Department
Proxy SDG 5 Indicators

5.3.1 (p). Proportion of women aged 20-24 years old who were married before age 18

5.a.1 (p). Distribution of agricultural land ownership at Farmer Registration System by sex
5.2.1. Proportion of ever-partnered women and girls aged 15 years and older subjected to physical, sexual or psychological violence by a current or former intimate partner in the previous 12 months, by form of violence and by age

**Definition of Indicator:** This indicator measures the percentage of women aged 15-59 years who have experienced physical, sexual and psychological violence by husband or intimate partner in the previous 12 months. The fact that if anyone subjected one of the behaviors including violence (defined in detail and asked separately in the questionnaire) at least once means that exposed to the violence.

**Data Source:** Ministry of Family and Social Services, Research on Domestic Violence Against Women in Turkey

**Disaggregation:** by form of violence, age group and marital status

**Timing of the indicator:** 2014
5.2.2. Proportion of women (aged 15-59 years) subjected to sexual violence by persons other than husband or intimate partner by age group

**Definition of Indicator:** This indicator measures the proportion of women aged 15-59 years subjected to sexual violence after the age of 15 by persons other than husband or intimate partner. Having sexually violent behavior at least once by people other than their husbands or intimate partners means exposure to sexual violence.

**Data Source:** Ministry of Family and Social Services, Research on Domestic Violence Against Women in Turkey

**Disaggregation:** by age group

**Timing of the indicator:** 2014
5.4.1. Proportion of time spent on unpaid domestic and care work by sex and age group

**Definition of Indicator:** This indicator is the proportion of average time spent in household services for unpaid domestic work and care work by individuals in total. Domestic and care work includes food preparation, dishwashing, cleaning and upkeep of a dwelling, laundry, ironing, gardening, caring for pets, shopping, installation, servicing and repair of personal and household goods, childcare, and care of the sick, elderly or disabled household members.

**Data Source:** TurkStat, Time Use Survey

**Disaggregation:** by sex and age group

**Timing of the indicator:** 2015
5.5.1. Proportion of seats held by women in The Grand National Assembly of Turkey and local governments

**Definition of Indicator:** This indicator represents the proportion of seats held by women in The Grand National Assembly and local governments as of the election date. The ratio of the seats of the women in the local administrations was calculated as a proportion from the sum of Provincial General Assembly Members, Metropolitan Municipality, Municipality and Municipal Assembly Members. The year 2015 is given according to the election results of 1 November 2015.

**Data Source:** TurkStat; Election of Representatives Statistics, Election of Local Administration Statistics

**Timing of the indicator:**
- a) 2011, 2015, 2018
- b) 2014, 2019
5.5.2. Proportion of women in managerial positions

**Definition of Indicator: This indicator refers to the proportion of females to the total number of persons employed in senior and middle management.** For the purposes of this indicator, sub-groups "11- Presidents, senior executives and legislators", "12- Commercial and administrative managers" and "13- Production and specialized service managers" are covered under the main group 1 of the International Standard Classification of Occupation (ISCO-08). Subgroup 14 (hospitality, retail and other services managers) is excluded from the main group 1 since these sub-groups comprise mainly managers of small enterprises. The general value of proportion of women in managerial positions includes all sectors.

**Data Source:** TurkStat, Household Labour Force Survey

**Disaggregation:** by economic activity

**Timing period:** 2012-2019
5.6.1. Proportion of women aged 15-49 years who make their own informed decisions regarding sexual relations, contraceptive use and reproductive health care

**Definition of Indicator:** This indicator refers to the proportion of women aged 15-49 years (married or in union) who make their own decision on all three selected areas i.e. can say no to sexual intercourse with their husband or partner if they do not want; decide on use of contraception; and decide on their own health care.

**Data Source:** Hacettepe University Institute of Population Studies, Turkey Demographic and Health Survey

**Timing of the indicator:** 2018
5.b.1. Proportion of individuals who use a mobile telephone within last three months, by sex, age group, education level and employment status

**Definition of Indicator:** This indicator is defined as the ratio of individuals in the 16-74 age group using mobile phones in the last three months (in January-February-March months of the relevant year) within the total population in this age group. Individuals aged 16-74 are covered.

**Data Source:** TurkStat, Survey on Information and Communication Technology (ICT) Usage in Households and by Individuals

**Disaggregation:** by sex, age group, education level and employment status

**Time period:** 2018-2019
### Proxy SDG 5 Indicators

#### 5.3.1 (p). Proportion of women aged 20-24 years old who were married before age 18

<table>
<thead>
<tr>
<th>Indicator Name</th>
<th>Global</th>
<th>Proxy</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Definition</strong></td>
<td>Proportion of women aged 20–24 years who were married or in a union before age 15 and before age 18</td>
<td>Proportion of women aged 20-24 years old who were married before age 18</td>
</tr>
<tr>
<td><strong>Definition</strong></td>
<td>The indicator captures all formal and informal cohabiting unions. For comparability, age 18 is used as a standard across countries as the common age of majority, though the threshold age between childhood and adulthood varies across countries, as does the legal age at marriage.</td>
<td>This indicator is calculated by dividing number of women who were married before age 18 and now in the 20-24 age group to the total women population in the same age group. It was calculated from administrative registers only for formal marriages.</td>
</tr>
<tr>
<td><strong>Data source</strong></td>
<td>Household surveys such as UNICEF-supported Multiple Indicator Cluster Survey (MICS) and Demographic and Health Surveys (DHS) have been collecting data on this indicator in low- and middle-income countries since around the late 1980s. In some countries, such data are also collected through national censuses, other national household surveys, or administrative data.</td>
<td>TurkStat, Marriage Statistics</td>

# Proxy SDG 5 Indicators

## 5.a.1 (p). Distribution of agricultural land ownership at Farmer Registration System by sex

<table>
<thead>
<tr>
<th>Indicator Name</th>
<th>Global</th>
<th>Proxy</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>(a)</strong> Proportion of total agricultural population with ownership or secure rights over agricultural land, by sex; and <strong>(b)</strong> share of women among owners or rights-bearers of agricultural land, by type of tenure</td>
<td>Sub-indicator (a) is a prevalence measure. It measures the prevalence of people in the agricultural population with ownership or tenure rights over agricultural land, disaggregated by sex. Sub-indicator (b) focuses on gender parity, measuring the extent to which women are disadvantaged in ownership / tenure rights over agricultural land.</td>
<td>Distribution of agricultural land ownership at Farmer Registration System by sex. This indicator shows the gender distribution of the agricultural land owner population in the Farmer Registration System.</td>
</tr>
<tr>
<td><strong>Data source</strong></td>
<td>Agricultural surveys/censuses or national household-based surveys having a suitable coverage of agricultural households.</td>
<td>Farmer Register System</td>
</tr>
<tr>
<td><strong>Available disaggregation</strong></td>
<td>sex</td>
<td>sex</td>
</tr>
</tbody>
</table>
Non-statistical SDG 5 Indicators

5.1.1. Whether or not legal frameworks are in place to promote, enforce and monitor equality and non-discrimination on the basis of sex

5.6.2. Number of countries with laws and regulations that guarantee full and equal access to women and men aged 15 years and older to sexual and reproductive health care, information and education

5.a.2. Proportion of countries where the legal framework (including customary law) guarantees women’s equal rights to land ownership and/or control

5.c.1. Proportion of countries with systems to track and make public allocations for gender equality and women’s empowerment

Irrelevant SDG 5 Indicator

5.3.2. Proportion of girls and women aged 15–49 years who have undergone female genital mutilation/cutting, by age

Published SDG5 Indicators
As of 29 December 2020, the document “Sustainable Development Indicators Roadmap for Türkiye” was prepared.

Currently, only Turkish version is available.

General content of the 205-page document:

• Information on Sustainable Development Roadmap need
• Analysis of current situation
• Production Plan of unavailable indicators
• Developing Regional, National and Sub-national indicators
• Reporting of global SDG indicators
• Planned studies
• Appendices
Road Map for Unavailable SDG 5 Indicators

• Analysis of current situation:

  Determining of unavailable and partially available indicators

• Production Plan of unavailable indicators

  • by organising Official Statistics Programme Working Group Meetings
  
  • by inviting responsible and related ministries and stakeholders
  
  • via their Administrative registers or adding questions to the surveys
5.3.1. Proportion of women aged 20–24 years who were married or in a union before age 15 and before age 18

- organising Official Statistics Programme Working Group Meetings
- examining indicator metadata
- inviting responsible and related ministries and stakeholders (Hacettepe University Institute of Population Studies)
- will be produced their Administrative registers or adding questions to the surveys
5.3.1. Proportion of women aged 20–24 years who were married or in a union before age 15 and before age 18

5.a.1 (a) Proportion of total agricultural population with ownership or secure rights over agricultural land, by sex; and (b) share of women among owners or rights-bearers of agricultural land, by type of tenure
Road Map for Partially Available SDG 5 Indicator- 5.a.1

- organising Official Statistics Programme Working Group Meetings
- examining indicator metadata
- inviting responsible and related ministries and stakeholders (Ministry of Agriculture and Forestry)
- their Administrative registers or adding questions to the surveys

• A module questionnaire must be added to any household or agricultural survey in order to produce the indicator.
Thank you
Teşekkürler
