

Session 2

# **MANUALS & GUIDELINES OF TOURISM STATISTICS**

### Presented by:

Ms. Kanageswary Ramasamy Department of Statistics, Malaysia 14-16 February 2017

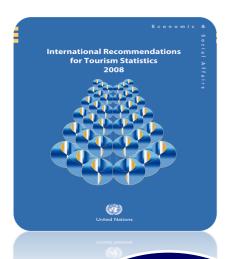

# **OUTLINE**

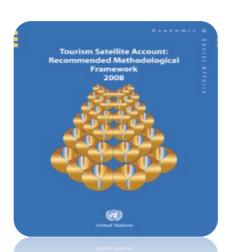

- 1 INTRODUCTION
  - 2 INTERNATIONAL RECOMMENDATIONS ON TOURISM STATISTICS (IRTS) 2008
- 3 RECOMMENDED METHODOLOGICAL FRAMEWORK (RMF) 2008

# **INTRODUCTION**

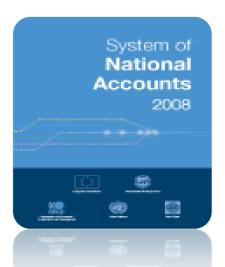

IRTS 2008:
concepts,
definitions,
classifications for
basic tourism
statistics

TSA: RMF 2008: framework for the economic measurement of tourism consistent with SNA, BoP

Credible, comparable statistics

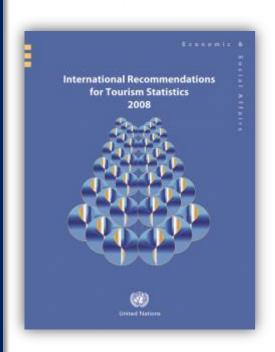

System of Tourism Statistics

Tourism as an economic sector (i.e. GDP, etc.)

# INTERNATIONAL RECOMMENDATIONS ON TOURISM STATISTICS (IRTS) 2008

The <u>IRTS 2008</u> provides the <u>main concepts, definitions and classifications</u> for the <u>measurement of tourism</u> in a <u>standard</u> way across countries.

The <u>IRTS 2008</u> was <u>approved</u> by the <u>United Nations Statistical Commission</u> (UNSC) at its 39th session (26-29 February 2008). It <u>revises and replaces</u> the previous <u>1993 Recommendations on Tourism Statistics</u> (1993 RTS) adopted by the Commission in 1993 and published in 1994.

Chapter 1: Development and needs for tourism statistics

Chapter 2: The demand perspective: basic concepts and definitions

Chapter 3: The demand perspective: characterization of visitor and tourism trips

Chapter 4: The demand perspective: tourism expenditure

Chapter 5: Classifications of products and productive activities for tourism

Chapter 6: The supply perspective

Chapter 7: Employment in the tourism industries

Chapter 8: Understanding tourism in its relationship with other macroeconomic frameworks

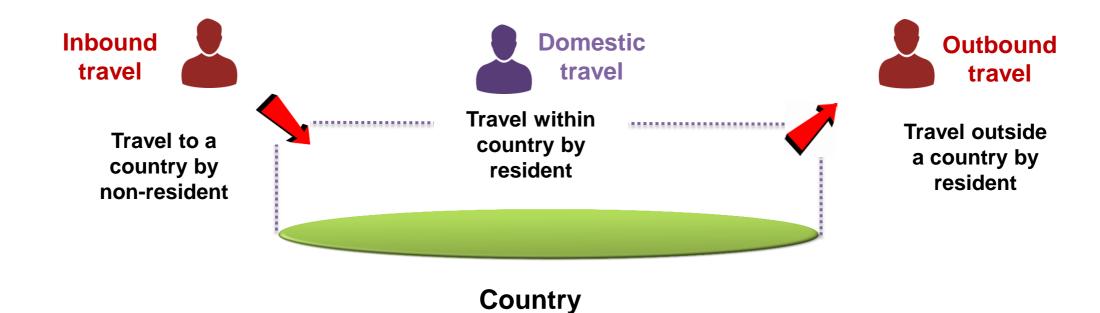

Chapter 9: Supplementary topics

### **TRAVEL**

• <u>Travel</u> refers to the <u>activity of travellers</u>.

### **TRAVELLER**

 A <u>traveller</u> is someone who moves between <u>different</u> <u>geographic locations</u>, for <u>any</u> <u>purpose and any duration</u>.

Tourism is a subset of travel and Visitors are a subset of travellers

A trip refers to the travel by a person from the time of departure from his usual residence until he/she returns

A visitor is a traveller taking a trip to a main destination outside his/her usual environment, for less than a year, for any main purpose (business, leisure or other personal purpose)

- 1 TRAVEL Travel refers to the activity of travellers.
- 2 **TOURISM** Tourism refers to the activity of visitors.
- 3 TRAVELLER A traveller is someone who moves between different geographic locations, for any purpose and any duration.
- 4 VISITOR A visitor (domestic, inbound or outbound) is classified as a tourist (or overnight visitor), if his/her trip includes an overnight stay, or as a same-day visitor (or excursionist) otherwise.

'Visitors' can be classified into 2 categories:

- Tourist (or overnight visitors)
- Same-day Visitor (or excursionist)

The travel of domestic, inbound or outbound visitors is called domestic, inbound or outbound tourism.

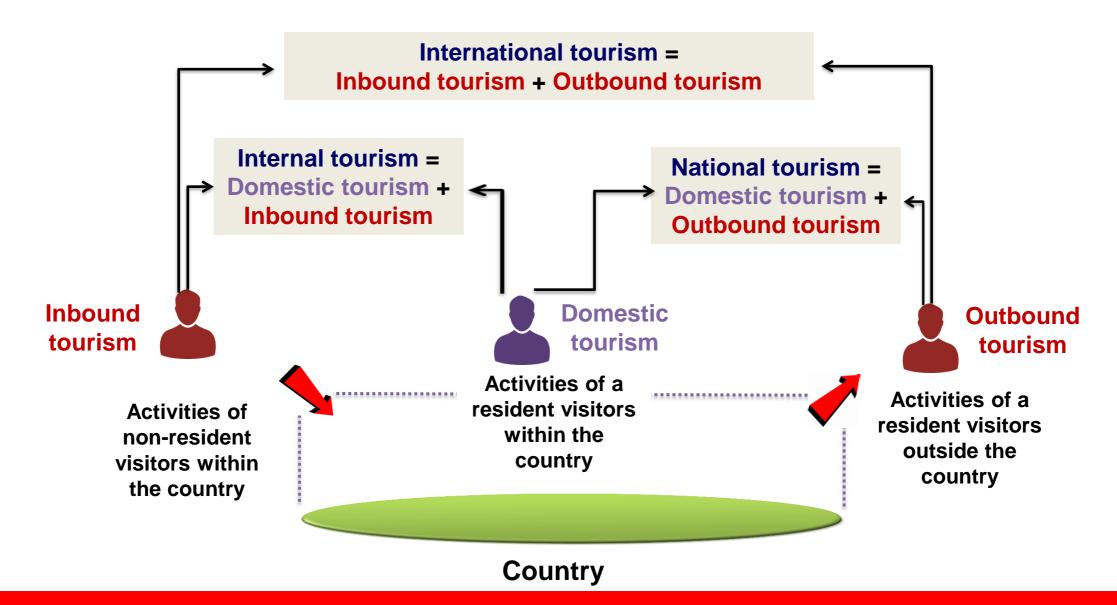

# Usual environment of an individual

includes the place of usual residence of the household to which he/she belongs, his/her own place of work or study and any other place that he/she visits regularly and frequently, even when this place is located far away from his/her place of usual residence

# Determination of Usual Environment

- (a) Frequency of the trip (except for visits to vacation homes)
- (b) Duration of the trip
- (c) The crossing of administrative or national borders
- (d) Distance from the place of usual residence

## **FORMS OF TOURISM**

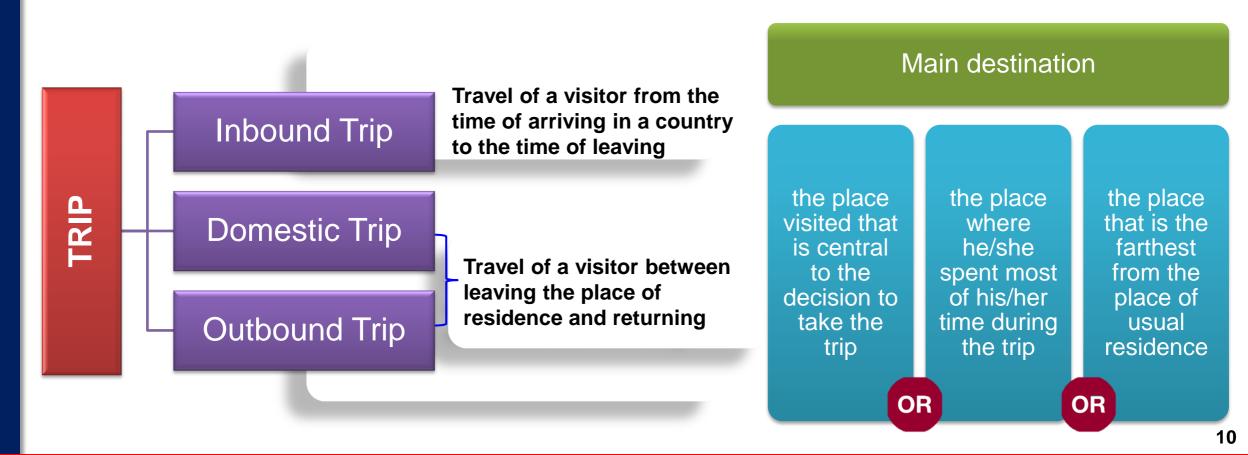

# **Chapter 2: Concepts and definitions**

A trip refers to the travel by a person from the time of departure from his usual residence until he/she returns

 Trips taken by visitors are tourism trips. A tourism trip is characterized by its main destination, among the characteristics (for example, main purpose)

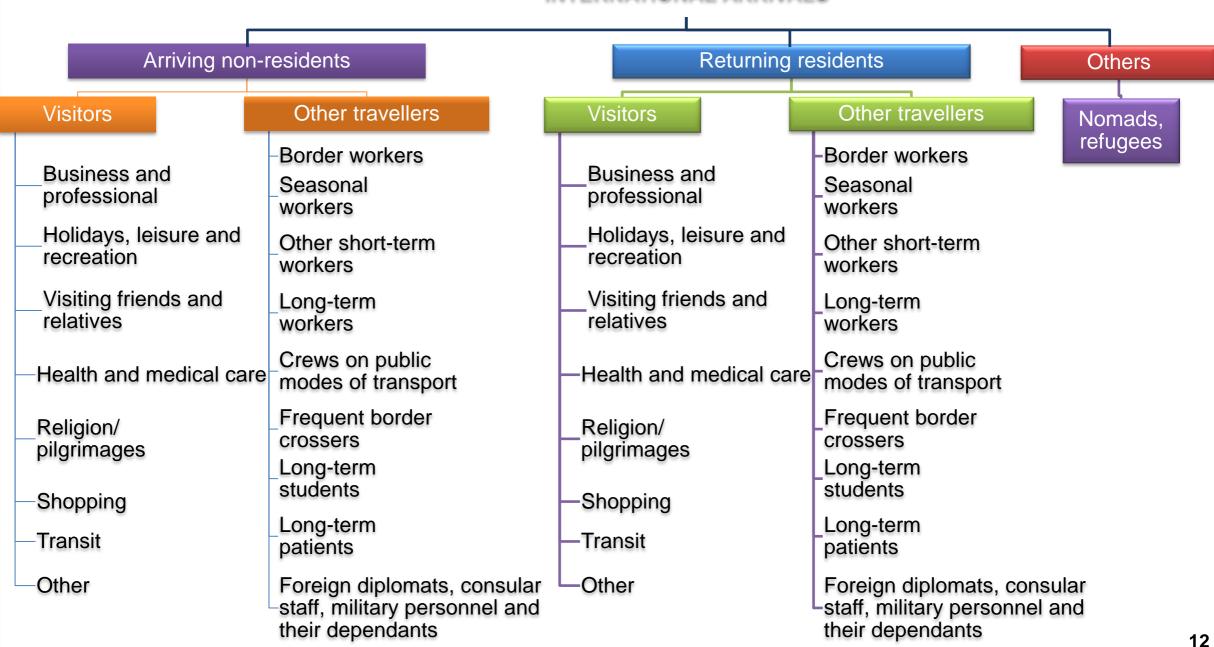

# **IRTS 2008**

## Classification of inbound travellers

# **IRTS 2008**

#### INTERNATIONAL ARRIVALS

# **Chapter 3: Characterization of visitor and tourism trips**

#### **MAIN PURPOSE**

- · Classification of tourism trips according to the main purpose
- 1. Personal
  - 1.1. Holidays, leisure and recreation
  - 1.2. Visiting friends and relatives
  - 1.3. Education and training
  - 1.4. Health and medical care
  - 1.5. Religion/pilgrimages
  - 1.6. Shopping
  - 1.7. Transit
  - 1.8. Other
- 2. Business and professional

#### **TYPES OF TOURISM PRODUCTS**

 A combination of different aspects around a specific centre of interest, such as nature tours, life on farms, visits to historical and cultural sites, visits to a particular city, the practice of specific sports, the beach, etc.

#### **ORIGIN AND DESTINATION**

- For inbound trips, it is essential to classify all arrivals by country of residence rather than by nationality
- For outbound trips, departures should be classified according to the main destination of the trip.

#### **MODES OF TRANSPORT**

- Major groups classification: air (scheduled flight etc), water (passenger line and ferry etc) and land (railway, motor coach or bus and other public road transportation etc)
- · Developed by UNWTO

#### **DURATION OF A TRIP OR VISIT**

- Number of trips
- Number of nights

#### TYPES OF ACOMMODATION

e.g: Hotel, motel, homestay, camping ground, holiday homes

# **Chapter 3: Characterization of visitor and tourism trips**

## Main purpose (IRTS 2008, para 3.10-3.21):

Definition: The main purpose of a trip is defined as the <u>purpose in the absence of which</u> the trip would not have taken place.

## Personal:

- Holidays, leisure and recreation (incl. vacation homes, incentive trips)
- Visiting friends and relatives
- Education and training
- Health and medical care
- Religion/pilgrimages
- Shopping
- Transit
- Other

## Business and professional:

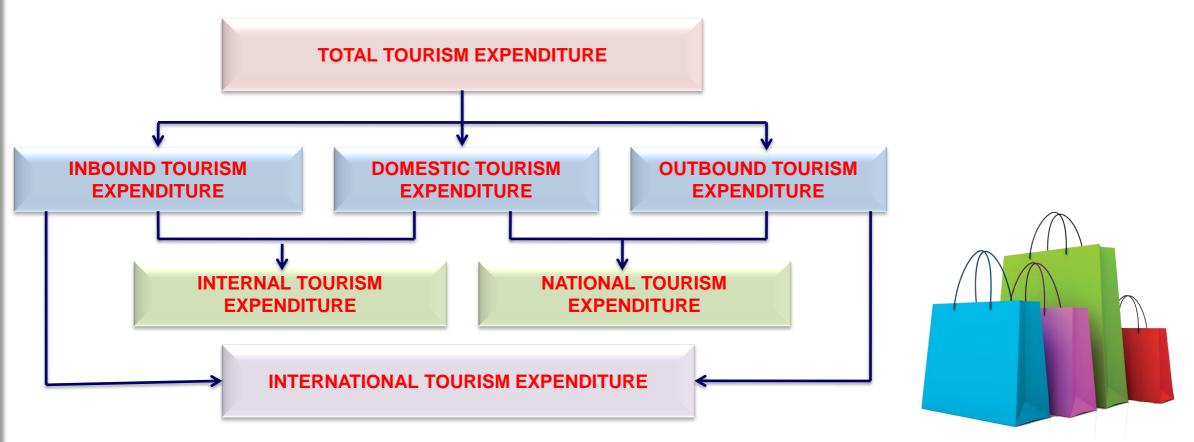

- Attending meetings
- Other business and professional purposes

# **Chapter 4: Tourism expenditure**

**Tourism expenditure** refers to the amount paid for the acquisition of consumption goods and services, as well as valuables, for own use or to give away, for and during tourism trips. It includes **expenditures by visitors themselves**, as well as **expenses that are paid for** or **reimbursed by others**.

## **CATEGORIES OF TOURISM EXPENDITURE**

# Chapter 4: The demand perspective: tourism expenditure

## (IRTS 2008, para 4.6 and 4.7):

Exclude: all expenditures that do not correspond to acquisition of goods and services or valuables:

- Tax payments
- Interests
- Current transfers in cash (i.e. family support transferred to the country of nationality)
- Purchase of financial and non-financial assets (i.e. land and real estate, but excluding valuables)

Purchase of housing, real estate are capital expenses according to SNA 1993 and BOP – excluded from tourism expenditure

Current expenses related to vacation homes, such as those usually incurred by an owner as a producer of accommodation services, should also be excluded from tourism expenditure.

# Chapter 4: The demand perspective: tourism expenditure

## **Definition (IRTS 2008, para 4.9 and 4.10):**

Following the rules of the System of National Accounts 2008 (see box 4.1), final consumption by households (individuals) is deemed to occur at the moment of the transfer of ownership of goods or that of the delivery of services, and not the time of its payment (Timing of expenditure).

Tourism expenditure follows the same rules. Consumption expenditure on transport services occurs when being transported, on accommodation services, when staying in the place of accommodation, on travel agency services, when the information is provided and the travel services are booked, etc.

# Chapter 5: Classification of products and productive activities of tourism

A. Consumption products:			
	A.1.	Tourism characteristic products: comprising two subcategories;	
		A.1.i. Internationally comparable tourism characteristic products, which represent the core products for international comparison of tourism expenditure;	
		A.1.ii. Country-specific tourism characteristic products (to be determined by each country by applying the criteria of paragraph <u>5.10</u> in their own context).	
		For both products mentioned above, the activities producing them will be considered as tourism characteristic, and the industries in which the principal activity is tourism characteristic will be called tourism industries;	
	A.2.	Other consumption products made up of two subcategories, both to be determined by each country and, consequently, country specific:	
		A.2.i. Tourism connected products comprising other products according to their relevance for tourism analysis but that do not satisfy the criteria in paragraph <u>5.10</u> ;	
		A.2.ii. Non-tourism-related consumption products comprising all other consumption goods and services that do not belong to the previous categories.	
В.	cann expe	<b>Non-consumption products:</b> This category includes all products that by their nature cannot be consumption goods and services and, therefore, can neither be a part of tourism expenditure, nor a part of tourism consumption, except for valuables that might be acquired by visitors on their trips. Two subcategories are defined:	
	B.1.	Valuables (see para. <u>4.2</u> );	
	B.2.	Other non-consumption products comprising those products associated with tour-ism gross fixed capital formation and collective consumption.	

# Chapter 5: Classification of products and productive activities of tourism

## **PRODUCTS**

- 1. Accommodation services for visitors
- 2. Food and beverage serving services
- 3. Railway passenger transport services
- 4. Road passenger transport services
- 5. Water passenger transport services
- 6. Air passenger transport services
- 7. Transport equipment rental services
- 8. Travel agencies and other reservation services
- 9. Cultural services
- 10. Sports and recreational services
- 11. Country-specific tourism characteristic goods
- 12. Country-specific tourism characteristic services

## **ACTIVITIES**

- 1. Accommodation for visitors
- 2. Food and beverage serving activities
- 3. Railway passenger transport
- 4. Road passenger transport
- 5. Water passenger transport
- 6. Air passenger transport
- 7. Transport equipment rental
- 8. Travel agencies and other reservation services activities
- 9. Cultural activities
- 10. Sports and recreational activities
- 11. Retail trade of country-specific tourism characteristic goods
- 12. Other country-specific tourism characteristics activities

# **Chapter 6: The Supply Perspective**

## IRTS 2008, para 6.2:

Tourism supply is understood as the direct provision to visitors of the goods and services that make up tourism expenditure.

## IRTS 2008, para 6.8:

In recognition of this heterogeneity, the System of National Accounts recommends the use of establishment as the unit which provides data that are more suitable for analyses of production.

The establishment (or local kind of activity unit in the European Union lexicon) is defined operationally as "an enterprise, or part of an enterprise, that is situated in a single location and in which only a single productive activity is carried out or in which the principal productive activity accounts for most of the value added" (System of National Accounts 2008 para. 5.14).

# **Chapter 6: The Supply Perspective**

# IRTS 2008, para 6.17:

As the classification of an establishment is based on its main activity, establishments having a particular tourism characteristic activity as a secondary activity should not be included in the tourism industry that is characterized by this activity.

For example, if a travel agency service is carried out as a secondary activity by a supermarket, then this travel agency service will be part of the total output of the retail trade industry and will not appear as part of the travel agency industry. The activity will only show up as a secondary output of the retail trade industry.

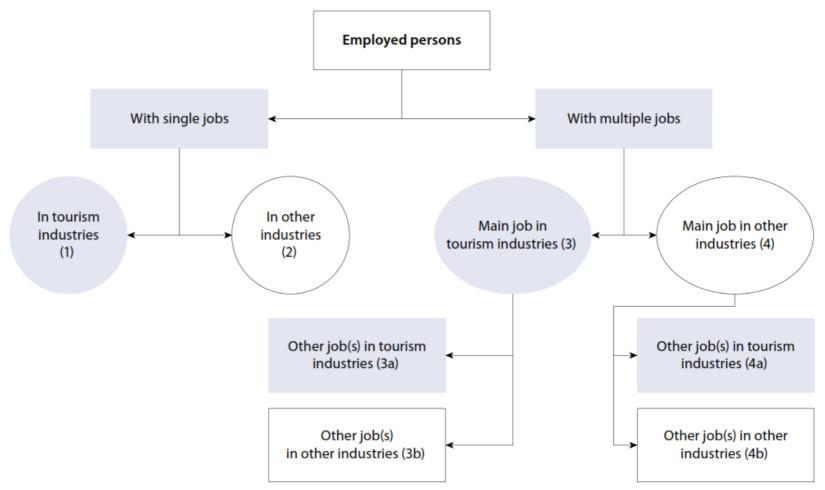

# **Chapter 7: Employment in the Tourism Industries**

Figure 7.1.

Single versus multiple job holders in the tourism industries

# IRTS 2008, para 7.1:

Employment is an important dimension in the characterization of tourism and in the acknowledgement of its importance from the productive, social and strategic points of view.

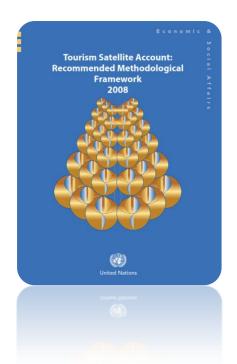

Persons employed in the tourism industries (all jobs) = 1, 3, 4a Persons employed in the tourism industries (main job) = 1, 3 Jobs in the tourism industries = 1, 3, 3a, 4a

# RECOMMENDED METHODOLOGICAL FRAMEWORK (RMF) 2008

The <u>Tourism Satellite Account: Recommended Methodological Framework 2008</u> (also known as the TSA: RMF 2008) provides the updated <u>common conceptual framework for constructing a TSA</u>.

It adopts the <u>basic system of concepts, classifications, definitions, tables and aggregates of the System of National Accounts 2008 (SNA 2008)</u>, the international standard for a systematic summary of national economic activity, from a functional perspective.

The **TSA** can be seen as a **set of 10 summary tables**, each with their underlying data:

- Inbound tourism expenditure,
- Domestic tourism expenditure,
- Outbound tourism expenditure,
- Internal tourism expenditure,
- Production accounts of tourism industries,
- The Gross Value Added (GVA) and Gross Domestic Product (GDP) attributable to tourism,
- Employment,
- Investment,
- Government consumption, and
- · Non-monetary indicators.

## **TOURISM SATELLITE ACCOUNT TABLES**

#### **TABLE 1**

Inbound tourism expenditure by products and classes of visitors

#### **TABLE 2**

Domestic tourism expenditure by products and classes of visitors

#### TABLE 3

Outbound tourism expenditure by products and classes of visitors

### TABLE 4

Internal tourism consumption by products

### TABLE 5

Production accounts of tourism industries and other industries (at basic prices)

### **TABLE 6**

Total domestic supply and internal tourism consumption (at purchasers' prices)

#### **TABLE 7**

in the tourism industries

#### **TABLE 8**

Tourism gross
fixed capital
formation of
tourism industries
and other
industries

### TABLE 9

Tourism collective consumption by product and level of government

#### TABLE 10

- Non-monetary indicators
- a) Number of trips and overnights by forms of tourism and classes of visitors
- b) Inbound tourism: number of arrivals and overnights by modes of transport
- Number of establishments and capacity by types of accommodation
- d) Number of establishments in tourism industries classified according to average number of jobs

## Internal tourism expenditure

- the tourism expenditure of visitors, both resident and non-resident, within the economy of reference. It is the <u>sum of domestic tourism expenditure</u> and inbound tourism <u>expenditure</u>. It includes acquisition of goods and services imported into the country of reference and sold to visitors. This indicator provides the most comprehensive measurement of tourism expenditure in the economy of reference

## Internal tourism consumption

- the tourism consumption of both resident and non-resident visitors within the economy of reference. It is the <u>sum of domestic tourism consumption and inbound tourism consumption</u>.

## Gross value added of tourism industries (GVATI)

- the total gross value added of <u>all establishments belonging to tourism industries</u>, <u>regardless of whether all their output is provided to visitors</u> and the degree of specialization of their production process.

## **MAIN AGGREGATES**

- Tourism direct gross value added (TDGVA)
  - the <u>part of gross value added generated by tourism industries and other industries</u> of the economy that <u>directly serve visitors</u> in response to internal tourism consumption
- Tourism direct gross domestic product (TDGDP)
  - the sum of the part of gross value added (at basic prices) generated by all industries in response to internal tourism consumption <u>plus</u> the amount of <u>net taxes on products</u> and imports included within the value of this expenditure at <u>purchasers' prices</u>
