## Collaborative on use of administrative data for statistical purposes

?? Fe?ruary ????

## Admin data quality assessment toolkit

Practically oriented and provides a generic base for local customization.

Meant to inspire and starting point for countries with no system in place.

Ī		-,
1	Part 1:	Quality Assessment of Administrative Data
	1.	Introduction
	2.	Objective
	3.	Approach
	4.	Administrative data and official statistics
	5.	Administrative data and quality assessment
	6.	Users and administrative data quality4
	7.	Administrative data and disaggregation5
	8.	Administrative data and bias5
	9.	Different types Part 2: Template for assessing the quality of administrative data
	10.	The statistica  1. Where to start?
	11.	Metadata
	12.	Quality dime  2. Step 1: The Statistical System, Institutional Framework and Agreements  Legal provisions
	12	b. Coordination of the National Statistical System

 Confidentiality and security

 Staffing
 17

 Step 2: Input data quality (Source)
 17

 Accuracy
 17

 Validity
 18

 Unique ID and disaggregation
 18

 Timeliness
 18

 Respondent burden
 19

 Step 3: Quality and data processing
 19

 Accuracy and completeness
 19

 Validity
 20

 Clarity
 20

 Coherence and Consistency
 21

 Technical checks
 21

 Step 4: Ensure quality of statistical outputs
 21

## **Components of the package**

## **Good quality is fit for purpose...**

...WHAT IS DEFINED AS THE PURPOSE OF THE STATISTICS BY THE USERS

TO ASSESS QUALITY, THERE NEEDS TO BE REGULAR MAPPING AND CONSULTATION OF USERS - DIALOGUE ON NEEDS AND EXPECTATIONS

...AND ALSO, WHAT IS PRACTICALLY POSSIBLE, TO MANAGE EXPECTATIONS
